DETAILED ACTION

1. Claims 1-21 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a transgenic knockout mouse whose genome comprises a disruption in the mouse's endogenous melanospin gene and method of using melanospin knockout mouse, classified in class 800, subclass 18.
 - II. Claim 9-15, drawn to a method of modulating circadian rhythm in a mammal by administering a therapeutic effective agent obtained after screening from melanospin knockout mouse, classified in class 424, subclass 9.2.
 - III. Claim 16-21, drawn to a method of modulating circadian rhythm in a mammal by administering an effective amount of a melanospin modulator, classified in class 514, subclass 1.
3. The inventions of groups II-III are patentably distinct, each from other because they are drawn to methods that have distinct steps, mode of action, require separate composition for practice and produce different results. For example, the method of group II requires modulating circadian rhythm in any mammal by agents screened from melanospin knockout mouse, which is different from method of group III that requires modulating circadian rhythm in any mammal by administering a melanospin modulator. They have distinct and different method step and require different compositions. Therefore searching for distinct method steps using different compositions will not coextensive in patent and non-patent literature.

The composition of the group I is patentably distinct each from the method of groups II-III because methods cannot be used to produce the compositions. Alternatively, the compositions will be used in more than one method.

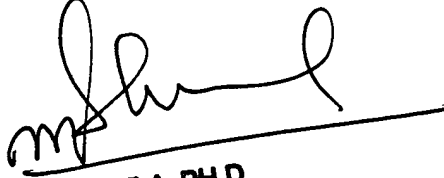

Art Unit: 1632

4. A search and examination of more than one invention as defined above would unduly burden the office. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
